

Heavy Civil Infrastructure Summer 2025 Internship at Skanska USA Civil

Company Website: [Skanska USA Civil](#)

Person to Contact: Anna Moll, anna.moll@skanska.com

Position Focus: Highway Construction

Posting Opportunity: Summer, Spring and Fall Paid Internship

Posting Location: Eastern Massachusetts / Rhode Island

Description: Skanska is searching for Current Students in the field of Civil Engineering, Construction Management and similar disciplines. This is a great opportunity to start a career with a company that builds things that matter and values its team. We are proud to share our culture of diversity and inclusion.

Our work makes a clear contribution to society and the environment around us. We build in many different [verticals](#). Whether we are building schools to provide inspiring spaces for learning, roads to connect communities or hospitals to care for patients, it all contributes to our purpose – we build for a better society.

[Skanska's values](#) —Be Better Together, Act Ethically and Transparently, Commit to Customer and Care for Life—are deeply engrained in how we work, which is why our values support and drive our [D&I](#) efforts.

The Skanska Internship Program targets students that are pursuing construction related degrees, but Skanska will consider individuals that may not have formal education opportunities but demonstrate a strong desire to become part of our company at an entry level. Pay rate \$25/hour.

Intern Positions Include: Engineering, Field Engineering (Mechanical or Civil), Cost Engineering, Safety Engineering, Estimating, and Equipment/Maintenance.

Engineering Internship Required Qualifications:

- Working towards Bachelor's in Construction Management, Civil Engineering or related field or equivalent through experience.
- Knowledge of basic phases of construction projects
- Knowledge of mathematics functions (geometry, basic algebra)

- Computer skills (MS Office, HCSS, CGC, etc.)
-

Come work with us and join a winning team! [Apply here!](#)
